## 1.5 Example: Formula

One of the nice things about the Linux Libertine font is that it comes with a math mode package.

$$f(x) = \Omega(g(x)) (x \to \infty) \iff \limsup_{x \to \infty} \left| \frac{f(x)}{g(x)} \right| > 0$$

### **2 First Content Section**

The content chapters of your thesis should of course be renamed. How many chapters you need to write depends on your thesis and cannot be said in general.

Check out the examples theses in the SDQWiki:

https://sdqweb.ipd.kit.edu/wiki/Form\_der\_Ausarbeitung\_bei\_Seminaren Of course, you can split this .tex file into several files if you prefer.

#### 2.1 First Subsection

#### 2.2 A Subsection

# **3 Second Content Section**

Add additional content sections if required by adding new .tex files in the sections/directory and adding an appropriate \input statement in thesis.tex.
